## BROKER UPDATE

**AMERICAN** CONSOLIDATED MINING CO.

This document was authorized

for release by:

DATE: TO:

April 7, 1983 Brokerage Firms

FURTHER INFORMATION: William D. Moeller

Chairman of the Board American Consolidated

Mining Company (801) 531-9864

Lisa Muehle or Adrienne Weston Communiquest (801) 328-9988

American Consolidated Mining Company is pleased to announce that the re-design of its ore processing plant in Gold Hill, Utah, has been completed, doubling the plant's capacity and enabling it to produce gold and silver, doré bars, rather than simply producing concentrate. Weather permitting, the plant will immediately begin processing 50 tons of ore per day from American Consolidated Mining Company's holdings in the Clifton Mining District in Tooele County, Utah, as part of a pilot program. From 50 tons of processed ore, the company expects to recover 200 ounces of silver per day, as well as significant amounts of gold. It is projected that by the 1st of May, the company will market its first Hallmark bars.

American Consolidated is also pleased to announce that a shipment of ore sent from the company's holdings in the Clifton Mining District is now being processed at Kennecott's processing plant in McGill, Nevada. Copper and tungsten are to be extracted from the ore body, as are gold and silver as byproducts. The processing of this ore was delayed by several months due to difficulties Kennecott was experiencing with the McGill plant.

This release was prepared by Communiquest, based on information supplied by American Consolidated. While Communiquest cannot guarantee the accuracy of this information, it was obtained from sources deemed to be reliable. American Consolidated Mining Broker Update Page 2

Due to the current depressed market value of tungsten and copper, and the economic feasibility of gold and silver recovery, American Consolidated will now direct its efforts primarily to the recovery of gold and silver, with copper and tungsten extracted as by-products.

American Consolidated Mining stock trades nationally overthe-counter through the National Daily Quotation Service.
